

Run Municipal Operations from One Real-Time, Map-Based System

TRAISR®

Assets • Work Orders • Permits • Inspections • MS4
— All in One System

For Municipal Leadership & Operations Teams

Run daily operations with clarity, confidence, and control — without adding administrative burden.

About TRAISR

TRAISR helps municipalities replace fragmented systems with a single, map-first platform for managing municipal operations. Designed for local government workflows, the platform improves visibility, coordination, and compliance while making day-to-day work easier for staff in the office and the field.

What TRAISR Covers

- Asset Management
- Work Orders
- Permitting
- Inspections
- Online Payments
- Fleet & GPS
- Citizen Requests
- MS4 Compliance
- ArcGIS Integration
- Online Permit & Licensing Portal

Replace Disconnected Systems

Unify assets, work orders, permits, and inspections into a single map-based system of record — eliminating spreadsheets, paper, and siloed tools.

Operate in Real Time

Field crews update work directly from mobile devices, giving supervisors and directors immediate visibility into what's happening on the ground.

Stay Audit-Ready

Centralize inspection history, documentation, and MS4 compliance records so audits and reporting are no longer fire drills.

- Trusted by 200+ municipalities nationwide
- Supporting operations serving 2.5M+ residents
- Native integration with ArcGIS Online (ESRI Partner)

One Cloud-Based Platform

TRAISR brings municipal operations into a single cloud-based platform that integrates with finance systems, GIS, GPS, aerial imagery, and plan review tools—so departments can work from one source of truth without replacing the systems they already use.
